Quickjoin System

Faster. No additional fitting accessories.

Panespol trusts in the continuous research to find always the best solution.

In order to offer the best results, Panespol has launched a new installation system that takes one step further our characteristics decorative panels. QuickJoin Systems enables an even faster installation process maintaining the security and efficiency of our products. Reach the most realistic finish only with the application of adhesive and screws, no other installation accessories required.

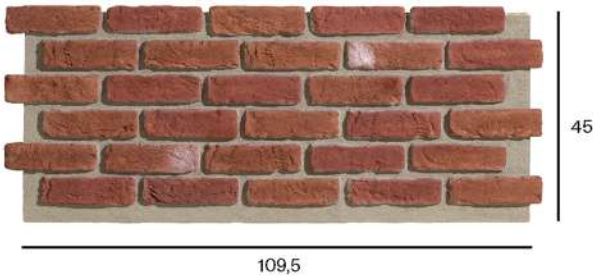

Comfortable becomes easy, Panespol believes decoration is a simple way to reinvent and not an unreachable goal.

Features

The advantages of our new system are:

- Easy and fast.
- Simple to fit.
- Invisible joints with no need for filler.
- Fire-resistant coating: Bs1d0.
- Reusable.

How is fitted?

01

Using a jigsaw, cut the panel horizontally and vertically so it lies straight and in line with the wall.

02

Apply a line of adhesive to the back of the panel.

03

Place the panel against the wall and drill a hole into the panel and the wall. Then fix the panel using wall plugs and screws.

04

Fit the next panel and fix it to the wall using its overlapping assembly system.

05

You can touch up small imperfections with granular paint.
